### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-4, 6 and 8-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Tanaka et al. (Japanese patent 04129570 A).

As to claims 1-4, 6 and 8-10, Tanaka (Fig. 2; abstract) discloses a balloon catheter comprising bag-like element having inside film 7a, outside film (formed by film 8/7b and 7c as shown in Fig. 2) and behaving in the manner as recited in the claims.

2. Claims 5, 7 and 11 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Tanaka et al. (Japanese patent 04129570 A).

As to claims 5, 7 and 11, Tanaka (Figs. 1-4; abstract) discloses a balloon catheter comprising bag-like element. The bag-like element must inherently be shrunk to wrap around catheter 1 for easy navigation in a blood vessel. Alternatively, it would have been obvious to one of ordinary skill in the art to provide a spring means to bias the bag-like element to be wrapped around catheter 1 during deployment for easy navigation in a blood vessel.

### ***Response to Arguments***

Applicant's arguments filed 6/10/2004 have been fully considered but they are not persuasive. TANAKA-'570A's Fig. 2 clearly shows outer film (of component film 8/7b and component film 7c) partially and directly joined to inside film 7a at connection sites 8. Notice that the translation of the wholeTANKA-'570A reference has not been provided.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

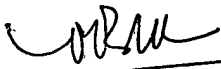

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
